

## FACTS ABOUT NEPAL

Approximately 81% of Nepal's 26 million people are engaged in agricultural production and have minimal access to health and social services.

The children who lack their mother's care find themselves in a critical situation. 10% of Nepalese children do not reach the age of five due to various illnesses often combined with malnutrition.

Nepal's high population growth rate is 2.24% per year on one hand combined with a high maternal mortality rate on the other, producing a growing number of children without proper care and support.

## SPONSORSHIP

A **SPONSORSHIP** of USD 760 or € 600, covers the living and schooling costs of a child at the "Children's Future Home" for an entire year. It includes costs for the child's nutrition, clothing, support by caretakers and expenses for school uniform and school items. The sponsor receives regular reports of the child's activities and growth.

## DONATION STATEMENT

- I support Home-Building-Project and forward a **DONATION** of USD \_\_\_\_\_ or € \_\_\_\_\_
- I agree to **SPONSORSHIP** of a child at the "Children's Future Home" with USD 760 or € 600 per year.
- I agree to **SUPPORT** the "Children's Future Home" with an annual pledge of USD \_\_\_\_\_ or € \_\_\_\_\_

## NEPAL AND HER CHILDREN

Nepal is a tiny Himalayan country sandwiched between China and India. Home to Mt. Everest Nepal is also famous for her beauty and hospitable people. The country attracts many visitors each year from all over the world.

"Children are the pillars of the nation", according to a Nepali quotation; however, there are many difficulties for Nepalese children to face during their lifetime.

Traditionally, the extended family has been the support system for children who have lost one or both parents. The unstable political scenario in the past decade has had a great impact on Nepal's economic development and the disadvantaged segments of society in particular. Hence, population pressure and societal changes are breaking down the traditional family and community network. Many family heads were lost during the armed conflict. Many other male family members migrate to neighboring countries in search of work leaving much of the responsibility to raise children and tend to the farm work on the shoulders of the women and elderly.

## CHILDREN'S FUTURE ORGANIZATION

### CFO-NEPAL

The registered nonprofit "Children's Future Organization", founded in 2003, is located in the capital city of Nepal, Kathmandu.

The co-founders are: a Nepalese citizen with extensive experience in Social Work, a Medical Doctor from Europe living permanently in Nepal and a Psychotherapist from Germany.

The children's home was established on the periphery of Kathmandu to provide green surroundings and healthy environment. All together 100 children are part of our CFO family as of December 2008. Our numbers continue to grow and the need for your help is increasing each year. Our space and resources are limited but how do you turn away a child in need? They are orphans or children lacking support of family members and community. Who can turn their back?

In 2008, our dream to purchase land in rural Dhading District has become reality. Now we are faced with the daunting task of raising funds to build a permanent children's home with more capacity to take care of disadvantaged children – especially those who will be with us for a longer term.

## GOALS AND TARGETS

- The purpose of the CFO-project is to bring improvement into disadvantaged children's lives and to equip them with knowledge & skills for a better future.
- CFO provides conditions that resemble life in a loving family environment and offers opportunities for quality education.
- Some of our children will be blessed with a loving adopted family. Others stay with the project until they complete their education and are able to make their living on their own.

## YOUR SUPPORT

The activities of "CFO-Nepal" are mainly financed by overseas **DONATIONS** through the individual child's sponsorships.

(Children in CFO-Nepal)

The organization is very much dependent on income through both donations and sponsorships especially during its first years, our aim being to buy land and build a child's home so that our high rent-costs can be saved.
